RESEARCH INTERESTS

Monetary Policy Transmission, Unconventional Monetary Policy, Bank Lending Channel, Distributional Effects of Monetary Policy

EDUCATION

Ph.D. in Economics, *Queensland University of Technology, Australia* 2026
Dissertation: "Effects of Unconventional Monetary Policy on Inequality and Bank Lending"
Principal Supervisor: Professor **Pedro Gomis-Porqueras**
Supervisors: Associate Professor **Jayanta Sarkar**, Dr. **Ruchith Dissanayake**

Master of Economics, *The University of Queensland, Australia* 2021
Dissertation: "Positive and Negative Effects of Negative Interest Rate Policy on the Liquidity Trap"
Supervisor: Dr. **Jorge Miranda-Pinto**

Bachelor of Natural Science, *Sichuan University, China* 2019
Major: Mathematics and Applied Mathematics

WORKING PAPERS

"Instruments Apart: Monetary Policy and Consumption Inequality across U.S. Regions and Income Groups"
(Job Market Paper) *SSRN Working Paper, 2026*

Abstract: This paper compares the distributional effects of the federal funds rate, forward guidance, and large-scale asset purchases on U.S. household consumption, using Consumer Expenditure Survey data for 1992–2019 and high-frequency shocks. Nationally, no instrument changes the consumption gap between the lowest and highest income quintiles. This average masks two differences. In the Northeast, unlike other regions, expansionary asset purchases raise non-housing consumption more for the lowest quintile. Among lower-income households, conventional interest rate policy lowers consumption more for renters than for mortgagors, and asset purchases do the reverse, pointing to a refinancing channel. Forward guidance has no consistent direction.

RESEARCH IN PROGRESS

- Negative interest rate policy, monetary policy shocks and bank lending in Germany
  Uses Deutsche Bundesbank confidential bank-level microdata

RESEARCH VISITS

Deutsche Bundesbank, *Frankfurt, Germany* August 2024
Research Data and Service Centre (RDSC): on-site analysis of confidential bank-level microdata for doctoral research.

HONORS AND AWARDS

- QUT Postgraduate Research Award (International), 2022–2026
- QUT HDR Tuition Fee Sponsorship, 2022–2026

SKILLS

Econometric Methods: Local Projections, Difference-in-Differences, (Panel) VAR, VECM
Software & Programming: Python, Stata, LaTeX
Languages: English, Chinese (Mandarin)
